EXPERIENCE

Senior Machine Learning Engineer, MLOps*Abridge**April 2023 - December 2025**Remote*

Early engineer at leading healthcare AI startup

- Built a massive speech-to-text system transcribing 4+ hours of audio per second
- Developed a singular API service consolidating access to all ML functionality across company
- Managed thousands of GPUs across multiple SKUs in a GCP & GKE environment
- Introduced new tools including Temporal, NVIDIA Triton, TensorRT-LLM, uv, Pydantic, FastAPI
- Created a unique CI/CD process to support dozens of engineers in a monorepo
- Lead incident response and post-mortems for our most severe service outages
- Mentored junior engineers across teams in software development and deployment practices

Staff Data Engineer, Data Science Enablement & Operations*Socure**June 2022 - January 2023**Remote*

DS support and ML platform at late-stage identity verification startup

- Maintained largest Airflow pipeline for onboarding new customers and models
- Created internal python packages enabling more robust pipelines

Lead Engineer, Data Engineering*Betterment**June 2021 - December 2021**Remote*

Centralized data engineering at late-stage fintech

- Introduced Pydantic into team toolkit for new AWS Lambda tasks
- Simplified developer experience of DE platform, increasing contributions by other teams

Senior Staff Engineer, Data Science / Cloud Platform*Everactive**March 2019 - May 2021**Ann Arbor, MI*

First data hire at series B industrial-IOT startup

- Migrated hundreds of millions of IOT packets into TimescaleDB
- Technical lead for company-wide API consolidation project spanning multiple years
- Negotiated strict JSON Schema contracts with hardware teams
- Wrote AWS ECS services & python libraries for automated failure detection from sensor data

Data Science Engineer*Methods Consultants**March 2016 - February 2019**Ypsilanti, MI*

Lead engineer at boutique data science & statistics consulting firm

- Built ML-powered trading platform for hedge fund on Kubernetes (GKE), Docker, R, Python
- Analyzed billions of rows of geolocation data with R, OpenStreetMap & AWS
- Developed and taught a data science workshop to analysts at a large federal institution
- Contributed technical content to company blog (<https://www.r-bloggers.com/2018/07/a-tour-of-timezones-troubles-in-r/example>)

Business Intelligence Analyst*Barracuda Networks**March 2013 - February 2016**Ann Arbor, MI*

Founding member of Analytics Department within Network Operations

- Processed terabytes of data in R to understand customer data deduplication patterns
- Built and managed a large MySQL data warehouse to enable longitudinal analyses
- Created R packages and Shiny applications to predict data center capacity needs

EDUCATION

Michigan Technological University

Bachelor of Science in Mathematics, minor in Economics

*April 2012**Houghton, MI*
